

Conferences and Trainings

Source: <http://www.medforum.pl/conferences>

We organize one of the biggest conferences and trainings for medical profession in Poland.

Thanks to combining knowledge with technical background we have been able to plan and organize many conferences and meetings of regional and national scope the participants of which were doctors and people connected with medical market.

While organizing conferences and trainings we use:

- modern tools used for presentations and sound system,
- Internet System of Conference Service (ISOK) which provides a complex service of participants. The System has the following elements:

- participant – registration of participation and abstracts, reservation of workshops
- accommodation and payment service
- specialised CMS – organizer, participant, accommodation service, sponsors, reception

- Wireless voting system Interwrite PRS provides an active and interactive participation of listeners. The system has the following functions:

- it enables the service of a dozen or so up to 2000 participants,
- integration with MS Power Point,
- graphic visualisation and archivisation of results,
- possibility of configuration and adapting to the organizer's needs.

Our partners in organizing meetings are biggest companies and institutions representing medical, pharmaceutical, financial and media businesses.

So far we have organized the following all-Poland conferences:

- Convention of Polish Psychiatrists, Szczecin 14th-16th June 2007 - www.zjazdptp2007.medforum.pl
- Cognitive Functions and Pharmacology, Wisła 13th-15th December 2007 - www.wisla2007.medforum.pl
- Prophylaxis in Paediatrics, Wisła 10th-12th April 2008 - www.pediatrics2008.medforum.pl

Planned conferences:

- III International Scientific-Training Conference: Modern Diagnostics in Psychiatry. "Liaison Psychiatry". Wisła 10-12 December 2009 - www.wisla.psychiatria.pl
- I Polish Scientific-Training Conference: Diagnostics in Neurology. Wisła 14-16 January 2010 - www.neurologia2010.medforum.pl
